About the exhibition

A majestic tyrannosaurus, a triceratops, various raptors and other prehistoric creatures are the protagonists of the family-friendly exhibition 'Dinosaur Invasion' hosted in the backdrop of Fabbrica del Vapore. Born out of the idea to conjure up **science, discovery, culture and technology** in a project that is suitable for both kids and adults, the exhibition displays **over 30 dinosaurs** located in 17 different environments. Youngsters and their parents have the chance to enjoy an ideal trip back in time – up to 250 million years ago – and enjoy a **real size Jurassic park** where they can observe and discover insightful highlights on scientific research and evolution. All dinosaurs recall their typical moves, moving their eyes, heads, tongues, tails and claws thanks to the ultimate 'animatronics' technology.
